

## Alberta Ag Plastics Information for Westlock County and Barrhead County:

We are a part of the Clean Farms ag plastics program at the Westlock Regional Landfill, we are accepting relatively clean Baling Twine and Netting, bagged and in separate bags. We can provide bags for the twine and netting, or your respective County can provide bags. Please try to shake them off some to limit the amount of straw and other things on them before putting them in the bag.

We are also taking Rolled tight grain bags and silage bags, if you have silage bags that are in pieces, we can take them as well, see video below for the equipment we will use for the silage pieces only. Any grain bags brought into the site not tightly rolled you will be charged an extra fee for processing. This also goes toward baling twine and netting, please bag it and recycle it, do not send it to the landfill. Silage bag preparation → <https://youtu.be/plSbLl80ltw>

Any of the above materials brought in separately from your regular waste will not be charged to your account and will not contribute to your yearly limits for your waste. If you desire to landfill it, you will be expected to pay at the landfill, double tipping fees. Our goal is to recycle this material, not landfill it.

If you have any further questions about this program, please contact the Alberta Clean Farms Representative. Davin Johnson, [JohnsonD@cleanfarms.ca](mailto:JohnsonD@cleanfarms.ca),
